Abstract (en)

[origin: WO2017114632A1] A method for laying veneer panels (14a, 14b) when manufacturing laminated veneer lumber, in which a billet (12) made up of a stack of multiple glued veneer panels is fed on a conveyor (10) to a press (16), and further veneer panels are layered on the billet (12) using at least two manipulators (20, 22), wherein each manipulator (20, 22) is assigned a working region (A, B) for laying the veneer panels on the billet, and the working regions of the manipulators are arranged in succession along the conveyor (10), characterized by an operating mode in which one of the manipulators (20) is used to feed a veneer panel (14b) to a laying location in the working region (B) of the other manipulator (22).
