Abstract (en)
[origin: WO2017115031A1] A motor vehicle bodywork element (1) comprising a support (3) integrated into the bodywork of the vehicle, and a plurality of optical fibres (5) of a given length, a first end of which rests on the side of the support (3) oriented towards the exterior of the vehicle, the part (50) of the optical fibres resting on the support being optically diffusing, and the optical fibres are connected by a second end to a remote light source (51), characterised in that the optical fibres are organised into a strand over all or part of the length of same.
