Abstract (en)  
[origin: WO2017116232A1] An auxiliary trolley (100) to be used for collecting shopping articles while using a dolly (190) for a crate (191), wherein the auxiliary trolley, comprises a frame, which frame - comprises a base frame section (120), which base frame section comprises two parallel frame parts provided with wheels (124), and - comprises a superstructure frame (130) section for pushing the auxiliary trolley ahead; and, a section selected from the base frame section (120) and the superstructure frame section (130) comprises arms for accommodating the dolly (190) for a crate (191) in between them. In case of an auxiliary trolley that takes up less space during transport and/or storage, the superstructure frame section (130) has a width that, at the most equals the distance between the first frame part (121) and the second frame part (122), and the two parallel frame parts are configured for accommodating an identical auxiliary trolley in between them.
