Abstract (en)  
[origin: WO2017114127A1] A support frame (100) for carrying a glass plate (200) and a glass transport frame are provided. The glass plate (200) has a first longitudinal side (211), a second longitudinal side (212) opposite to the first longitudinal side (211) along a lateral direction, a first lateral side (221) and a second lateral side (222) opposite to the first lateral side (221) along a longitudinal direction, and the first longitudinal side (211) has a length smaller than a length of the second longitudinal side (212), wherein the support frame (100) has a first concave (110) and a second concave (120), the first concave (110) matches with a shape of the glass plate (200) when the glass plate (200) is placed in a first orientation along the lateral direction, the second concave (120) matches with a shape of the glass plate (200) when the glass plate (200) is placed in a second orientation opposite to the first orientation, and the first concave (110) and the second concave (120) are at least partially overlapped.
