Abstract (en)
[origin: WO2017115391A1] A modular wall (1, 2) for health departments is described, comprising at least one wall module (10, 20) connected to a carrier structure (100) through undercut means (110) adapted to allow deforming elastic means (120) for fastening and supporting the at least one wall module (10, 20), the wall module (10, 20) comprising the undercut means (110) and the carrier structure (100) comprising the elastic means (120), the carrier structure (100) being composed of at least two columns (101) fastened by means of a base (102), each column (101) being composed of at least one pair of rods with open shaped profile adapted to be elastically deformed for blocking and supporting the wall module (10, 20).
