Abstract (en)

[origin: WO2017114635A1] The invention relates to a component (2, 3, 4) of a hydraulic device (1), functioning in particular as a fluid line of a hydraulic high-pressure device and/or a fuel injection system for internal combustion engines, comprising a tubular base body (15, 16, 17). At least one part (28, 28') of the base body (15, 16, 17) is formed of a material based on at least one duplex steel. The invention also relates to a hydraulic device (1) having at least one component (2, 3, 4) of this type.
