Abstract (en)
[origin: WO2016169672A1] The invention relates to a method for producing a fitting (2,3) for the treatment of aqueously suspended fibrous material (1) in a treatment gap (4), consisting of a base body (5) with treatment elements (6) facing the gap (4). In this case, the expenditure on production shall be reduced by virtue of the fact that the treatment elements (6) are applied at least partly as a layered structure consisting of a liquid or solid material and are thereby subjected to a physical or chemical curing or melting process.

Abstract (de)
Die Erfindung betrifft ein Verfahren zur Herstellung einer Garnitur (2,3) zur Behandlung von wässrig suspendiertem Faserstoff (1) in einem Behandlungsspalt (4), bestehend aus einem Grundkörper (5) mit zum Spalt (4) weisenden Behandlungselementen (6). Dabei soll der Herstellungsaufwand dadurch vermindert werden, dass die Behandlungselemente (6) zumindest zum Teil schichtweise aus einem flüssigen oder festen Werkstoff aufgetragen und dabei einem physikalischen oder chemischen Härtungs- oder Schmelzprozess unterzogen werden.
