Abstract (en)

[origin: EP3398735A1] Embodiments of the invention include a razor unit (10) for a safety razor system, comprising: a blade housing with a plurality of blades; a guard in front of the blades in the shaving direction; and a cap behind the blades in the shaving direction, together providing a shaving plane extending from a skin contacting surface of the cap to a skin contacting surface of the guard; a connector (21) for detachable connection to an elongate handle of the shaving razor system; and a finger grip (25), the finger grip extending from the guard.
