Abstract (en)
[origin: EP3398879A1] The present invention relates a hazardous goods cabinet (10) for storing hazardous goods containers (50), said cabinet (10) comprising a cabinet housing (11) which borders an interior space (18), whereby at least one storage device (22) for storing the containers (50) is placed or formed inside the interior space (18), said storage device (22) comprising a base plate (23) for parking the containers (50), whereby for the purpose of inserting and removing containers (50) the base plate (23) of said storage device (22) comprises a first insertion end (24) and a second removal end (25), both cooperating with an insertion opening (26) and a removal opening (27), both being formed in the cabinet housing (11). In order to prevent any unauthorised removal of goods being stored inside the cabinet (10). the cabinet housing (11) comprises a front wall (12), a rear wall (13), a first side wall (14) and a second side wall (15), whereby the base plate (23) extends between both side walls (14, 15), whereby the insertion opening (26) is formed in the first side wall (14) and the removal opening (26) is formed in the second side wall (15), both openings (26, 27) being closed by a closing device , a flap (28, 29) for example. A divider device (32) may be provided forming a first and a second storage area for the uptake of different types of container (50a, 50b). In addition, a blocking device may be provided being capable of preventing a removal of a container (50) being parked on the base plate (23) of the storage device (22).
