Abstract (en)

[origin: EP3399011A1] The present invention relates to a composition for lavatory cleaning comprising: i) at least one surfactant; ii) at least one filler; iii) at least one non-hydraulic binding agent; iv) optionally at least one bittering agent; v) optionally at least one solvent; vi) optionally at least one additive; and vii) optionally fragrance components and/or a perfume. The invention further relates to toilet rimblock and toilet cleaning system comprising said composition, the use of this composition as a toilet rimblock formulation for cageless release devices, the use of a non-hydraulic binding agent in sanitary cleaning compositions for stabilizing the shape of a toilet rimblock and the use of a non-hydraulic binding agent for increasing child-safety of a toilet rimblock or solid detergent.
