Abstract (en)

A twisted union yarn (24) of the present invention includes a filament and staple composite spun yarn (20) composed of a first multifilament yarn (22) and staple fibers (21), and a second multifilament yarn (23) arranged on the outside of the filament and staple composite spun yarn (20). The staple fibers (21) include animal fibers. The twist direction of the filament and staple composite spun yarn (20) is different from that of the second multifilament yarn (23). A woven fabric or a knitted fabric of the present invention includes the twisted union yarn (24). A textile product for clothing of the present invention is obtained by using the woven fabric or the knitted fabric. The present invention provides the twisted union yarn that has improved stretchability and washability by winding another multifilament yarn around the filament and staple composite spun yarn, and the fabric and textile product for clothing that use the twisted union yarn.
