Abstract (en)

[origin: EP3399230A1] A lighting module, including: - a planar printed circuit board (10) folded into a three-dimensional structure (24) having three or more planar faces (26) extending around a main axis (A), - three or more electrically powered light radiation sources (14) fixed to respective faces (26) of said three-dimensional structure (24) and having respective light emitting surfaces (16) facing outwards of said three-dimensional structure (24), wherein the light radiation sources (14) are angularly equidistant from each other in a plane orthogonal to said main axis (A) along an angle of 360°.
