Abstract (en)
[origin: WO2017118454A1] The invention relates to a piece of seating furniture (1) formed from two seat shells (2, 3) connected to one another, which form a seating surface and a backrest of the piece of seating furniture (1) as a connected component, wherein the upper and lower seat shells (2, 3) connected to form the piece of seating furniture (1) are designed approximately identically in construction and same are connected to one another only in the edge region (4) thereof such that a free, narrow and flat gap space (5) remains between the seat shells (2, 3), which holds a decal sheet (7) via a slot-shaped access opening (6) on the top side (10) of the backrest and/or on the front edge (11) of the seating surface and/or in the rear surface of the piece of seating furniture (1), which decal sheet is approximately the size of the surface of the piece of seating furniture (1).
