Abstract (en)

[origin: WO2017144249A1] A fitting arrangement for a sliding door comprises a carriage (14) that includes a carriage member (16) and at least two track rollers (20) which are mounted on the carriage member (16) in such a way as to be able to rotate about a common axis and which are located at a distance from each other in the direction of the axis. The track rollers (20) each have a diameter that increases or decreases as the distance from the other roller (20) increases.
