Abstract (en)

The present invention relates to a laundry washer-dryer comprising a duct (3) conveying a moist air stream (F1) from a bottom (7) of a tub (1) which is adapted to contain laundry during drying, said bottom extending in a first direction of extension (Y-Y), said duct (3) having one section (6) extending in a second direction of extension (Y-Y) which is transverse to said first direction of extension (X-X). The machine is characterized in that it comprises a tank (9) having a preset volume, which extends in said first direction of extension (Y-Y) and is located within said duct (3) with the moist air stream (F1) flowing therethrough, said tank (9) being closed at a bottom end (11) and open at a top end (12) thereof, a connection (13) located at said lower end (11) of said tank (9) to introduce water from the water supply system into the volume of said tank (9).
