Abstract (en)
[origin: EP3401627A1] The present disclosure refers to a household refrigeration appliance and, more specifically, to a household refrigeration appliance with a multifunctional shelf. A multifunctional shelf arrangement is provided, including: a shelf (10) comprising a frame (20) physically associated with walls (31) of an internal box (30) by shelf rails (40); the frame (20) comprising side portions (21), a front portion (22) and a rear portion (23); at least one accessory (50) physically associated with the shelf (10); accessory rails (60) proximate the shelf (10), the accessory rails (60) defining at least one track (70) for displacement of the at least one accessory (50); wherein the frame (20) comprises a plurality of receiving structures (24); and wherein the accessory rails (60) include engaging projections (90) which cooperate directly with the plurality of receiving structures (24) of the frame (20) so that the accessory rails (60) are removably fitted with the receiving structures (24).
