Abstract (en)
[origin: WO2017122191A1] This invention provides a single dual-purpose clip that accompanies the plant from the seedling stage at the nursery to full growth at the greenhouse. The clip comprises a ring with an opening, levers attached to the ring at opposing locations to the opening, inwardly deflected projections at the opening edges and arms extending outwardly from the edges, with edges configured for holding a wire that can be attached to an elevated wire of a trellising system.
