Abstract (en)
[origin: WO2017121816A1] The invention relates to a device for casting cast parts according to the permanent mold casting method, comprising: a pivotable retaining element (9) for holding a permanent mold (13, 16), a furnace (11), which can be connected to a low-pressure permanent mold (13) in such a way that melt can be fed to the low-pressure permanent mold (13) according to the low-pressure method, and a melt-feeding apparatus (17), by means of which melt can be fed to a gravity permanent mold (16), wherein the gravity permanent mold (16) can be arranged on the retaining element (9).
