Abstract (en)
[origin: EP3404677A1] The invention is concerned with a protection arrangement for an inductive device (42, 44, 46, 48, 50, 52) as well as to an inductive apparatus comprising such a protection arrangement and inductive device. The protection arrangement comprises a first enclosure for housing the inductive device, where the first enclosure has at least one wall (12) comprising a first layer (24) of non-magnetic steel and a second layer (26) of bullet protecting material.
