Abstract (en)

[origin: WO2017125288A1] A discharge device (14), for a film package (12) for storing a single-component or multi-component mass, has at least one receptacle (32) for inserting a film bag (16) of the film package (12) and at least one piston (34) movably arranged in the receptacle (32) for discharging the mass out of the film package (16). The piston (34) comprises a receiving groove (36) for accumulated film sections (44) of the at least partially emptied film bag (16). A film package (12) for storing a single-component or multi-component mass has at least one elongated film bag (16) that is not inherently rigid and at least one inherently rigid carrier part (18) on which an axial end (20) of the film bag (16) is attached. The at least one carrier part (18) comprises a receiving groove (28) for accumulated film sections (44) of the at least partially emptied film bag (16).
