Abstract (en)

The present application is disclosed an anti-collision corner protector of laptop bag, including: at least a corner-protective inner layer arranged at the corner of the laptop bag; a raised portion is extended outward from an upper surface of an end of the corner-protective inner layer, a middle portion of an upper surface of the corner-protective inner layer is extends inward to form a grooved portion; under a influence of external force, the upper surface of the corner-protective inner layer can be bent toward the laptop, the raised portion acts on the side of the laptop, and the grooved portion contacts with the corner of the laptop. The present application further includes a laptop bag, and the corner protector is arranged at the corner of the laptop bag. The anti-collision corner protector can effectively protect the laptop and be set inside the laptop bag, which will not affect its appearance design, and reducing the manufacturing cost. In addition, the anti-collision corner protector and the laptop have good adaptability and expansibility.
