Abstract (en)

[origin: WO2017129927A1] The invention relates to a cosmetic article (1) comprising: a cosmetic product reserve (14), and at least two meshes (15), one upstream and one downstream relative to the direction in which the product is discharged from the article, said meshes including through-holes (16) and being arranged such that the product passes through the upstream mesh and subsequently through the downstream mesh.
