Abstract (en)
[origin: WO2017130150A1] The invention relates to a support (1) for physical exercise comprising a first supporting surface (12, 112) and at least a second supporting surface (22, 122), each adapted to accommodate at least one person and optionally at least one piece of sporting equipment, said supporting surfaces (12, 22, 112, 122) being tiltable, by rotation about at least one axis (X1, X2), between a respective position of balance and respective positions of imbalance, characterized in that the supporting surfaces (12, 22, 112, 122) are mutually interconnected so that the rotation of one supporting surface influences the rotation of the other supporting surface, and vice versa.
