Abstract (en)
[origin: WO2017174291A1] The invention relates to a ceiling module (8, 66) for a vehicle (2, 64), which comprises a pivotally mounted ceiling flap (12) for covering a ceiling opening (22), and a carrier device (10) for holding one or more electrical components (44, 46). In order to save space in the vehicle (2, 64), the carrier device (10) comprises a lateral wall (42) having a hinge opening (48) on which the ceiling flap (12) is pivotally mounted.
