Abstract (en)

[origin: CA3015422A1] The invention relates to a conventionally-designed can lid (1) particularly intended for drinks cans, characterised in that in order to form an opening that reseals in a liquid-tight manner, a substantially annular plastic moulded part (15) is secured to the underside of the lid surface (3) so as to enclose the opening region (4); a plastic stopper part (16) is rigidly secured to the underside of the tongue-tab, which can be pivoted out when opening, said plastic stopper part engaging with the moulded part (15) such that a seal is formed; and the peripheral contour of the tongue-tab (4) is positioned, preferably in the region of the moulded part (15), at a predetermined distance from the stopper part (16).
