Abstract (en)
[origin: CA3011069A1] The invention relates to a device for creating an underwater construction having a cured filling mass, wherein the device has a housing having a holding volume and also has a filter apparatus, which is arranged at least partially therein and is designed to filter out components that were removed from the filling mass. The invention further relates to a filter apparatus that can be used in the device, and to a method for filling a device for creating an underwater construction with a filling mass using said filter apparatus.
