Abstract (en)

[origin: WO2017129344A1] The invention relates inter alia to a method for operating a sanitary device (20), in which a flushing liquid, in particular water, is guided through a conduit system of the sanitary device (20). According to the invention, it is provided that the liquid consumption of at least one sanitary component (50) of the sanitary device (20) is controlled as a function of or at least also as a function of the liquid consumption in the past.
