Abstract (en)  
The sealing strip for vehicle doors comprises a main body (1) that can be assembled on at least one of the edges of a vehicle door (4), and is characterized in that it also comprises a light emitting element (3) and in that said main body (1) is made of a translucent or transparent material, allowing the passage of light out from said light emitting element (3). It allows the sealing strip to be seen both by passengers inside the vehicle and passengers outside the vehicle, as well as by any passenger between the actual leaves of the door.
