Abstract (en)  
[origin: EP3410019A1] The present invention provides a cooker hood and a housing assembly thereof. The housing assembly of the cooker hood provided in the present invention includes: a housing and a fume inlet portion. The fume inlet portion includes an air inlet and a guiding plate; the fume inlet portion is adapted to be switched between a first position and a second position; the fume inlet portion at least partially extends out of the housing when the fume inlet portion is switched from the first position to the second position; the guiding plate is adapted to be switched between a third position and a fourth position; the guiding plate seals the air inlet when the guiding plate is located at the third position; and when the guiding plate is located at the fourth position, the air inlet is open, and the guiding plate is adapted to guide an airflow to flow into the air inlet. The cooker hood includes the housing assembly. The present invention reduces the volume while resolving a problem of colliding with a head.
