Abstract (en)

[origin: CN108980929A] The present invention relates to an extractor hood which comprises a housing (11) and at least one filter element (13) which can be detachably fastened to the housing (11). The extractor hood (1) is characterized in that the extractor hood (1) has an inductive transmission device (14) and the filter element (13) has at least one electrical load, a primary coil (141) of the transmission device (14) is arranged on the housing (11) of the extractor hood (1) and a secondary coil (143) is arranged on the filter element (13), and the secondary coil (143) is connected to the at least one electrical load.
