Abstract (en)
[origin: EP3410411A1] A refuge guide system including a central server (10), a refuge guide device (100), a plurality of fire monitoring devices (30), and a wireless communication device (40). The plurality of fire monitoring devices (30) transmit a fire information to the central server (10). The wireless communication device (40) provides communication between the central server (10) and the refuge guide device (100), and provides a positioning information to the refuge guide device (100).
