Abstract (en)
[origin: EP3410673A1] A method for sending a mail while downloading data, comprising the steps of: upon receipt of a data viewing request, a terminal sending the data viewing request to a server; the server sending, according to the data viewing request, data corresponding to the data viewing request to the terminal; upon receipt of the data, the terminal displaying the data in a display region of the terminal; the server sending, according to the data viewing request, the data corresponding to the data viewing request to a mailbox address in account information of the user who sent the data viewing request; and the server sending the data to a cloud storage account on the server. After the user views the data, the server sends the data to the mailbox of the user and to the cloud account to facilitate the user to view the data of products that have been browsed.
