Abstract (en)

[origin: WO2017134207A1] Disclosed is a device for dispensing cleaning agent into a dishwasher, comprising a cover element for closing or opening at least one opening (2) in a storage compartment (1) for storing the cleaning agent, the storage compartment (1) comprising at least one base wall (8) opposite the opening (2), and at least one side wall (7) that extends transversely to the base wall (8), the device improving the prior art. To achieve said aim, at least one water directing element (5, 9) is arranged for directing and/or conducting water.
