Abstract (en)

[origin: WO2017133967A1] The present invention relates to an incision instrument (1) for performing incisions in a standardized manner in the opening of an operation field, comprising a handle element (5) with a cutting blade receiving element (7, 8) formed at a distal end of the handle element (5), a cutting blade (3, 4) which is removably receivable in the cutting blade receiving element (7, 8) as well as a guide channel (9) that extends in the longitudinal direction of the instrument (1) for receiving a guide wire therein.
