Abstract (en)

[origin: WO2017132715A1] The invention relates to a device (1, 1a,..., 1c) for removing the core from a cast workpiece (2), said device (1) comprising at least one hammer (3), the at least one hammer (3) being equipped with a hammer head (4) and at least one tappet (6) that transmits energy to the hammer head (4) and is arranged so as to be movable in a working cylinder (5) of the hammer (3), the working cylinder (5) being in permanent fluid connection with at least one working volume (7a, 7b) of a cyclically operated piston compressor (8).
