Abstract (en)
[origin: WO2017134082A1] The method for realising on a sleeve (1) for flexographic printing a guide (2) for laying and cutting a cliché (10) and/or a bi-adhesive layer interposed between the sleeve (1) and the cliché (10) comprises the following steps: realising at least a longitudinal profiled element (7) longitudinally provided with a surface guide cavity (8) for laying and cutting the cliché (10) and/or the bi-adhesive layer; making, on an external coating layer (6) of the sleeve (1), a groove (9) having a smaller depth than the thickness of the external coating layer (6) and configured for housing said profiled element (7) inside thereof; only partially filling said groove (9) with a polymerisable glue (11) or apply to the surface of said groove (9) an adhesive layer; positioning, on the glue (11) or on the adhesive layer, the profiled element (7) with the cavity (8) facing the outside of the groove (9).
