Abstract (en)
[origin: WO2017133985A1] Disclosed is an anti-theft module (10) for an electric machine tool (12), comprising a position identification unit (50) for determining a geographical position of the anti-theft module (10), and at least one first data interface (52) for transmitting data, in particular position-related data, to an external device (54). The anti-theft module (10) of the invention is characterized in that same can be or is mounted on a cable (14) that is permanently connected to the electric machine tool (12). Also disclosed is an electric machine tool (12) comprising a corresponding anti-theft module (10).
