Abstract (en)  
Autonomous cleaner (10) includes body (20) and auxiliary brush (100). Auxiliary brush (100) is attached to body (20) so as to be capable of collecting dust to suction port (20B) provided in bottom surface (20A) of body (20) and includes short bristle bundle (141) and long bristle bundle (142). Short bristle bundle (141) is a bundle of short bristles. Long bristle bundle (142) is a bundle of bristles longer than short bristle bundle (141). This makes it possible to provide autonomous cleaner (10) and auxiliary brush (100) therefor that can efficiently collect dust.
