Abstract (en)  
[origin: EP3412418A1] The invention relates to a machine for cutting food products into wavy sticks (62; 63), comprising a cutting head (10) comprising a plurality of cutting stations (12), each provided with a wave-shaped blade (20) that extends vertically and a plurality of horizontal blades (30) superimposed and spaced apart; and a rotatable drum (50) coaxially disposed within said cutting head (10). Each cutting station (12) comprises a support device (24;124) of the wave-shaped blade (20) and a support device (34) of the horizontal blades (30), spaced radially from each other. The horizontal blades (30) are formed with a cutting edge (32) oriented towards the inside of the cutting head (20) and with a side (33) in contact with, or in proximity to, the wave peaks (21) of the wave-shaped blade (20).
