Abstract (en)  
[origin: WO2017137052A1] An aerodynamic toy (10) for throwing by hand in a motion along a trajectory (102) whilst spinning (104) about a rotational axis (40) of the toy (10) in a rotational plane (44). The aerodynamic toy (10) comprise an aerodynamic body (12) substantially extending radially from the rotational axis (40) to an outer periphery (20). The body (12) is configured with an aperture (18). The body (12) may have an aerodynamic profile (106). The toy (10) have a stabilizer (30) configured to be mounted and demounted in the aperture (18) of the toy (10).
