Abstract (en)
[origin: WO2017137079A1] The present invention relates to a device for manufacturing and/or processing components such as flexible tubes made from prefabricated tubular bodies for example, said device comprising at least means for supporting the components, means for moving said components past a plurality of workstations (49); said device is notable in that it comprises means (45, 58) of transporting, in a closed path referred to as a main path, a plurality of turrets referred to as satellite turrets (46) which are mounted with the ability to rotate on said means (45, 58) of transport, said satellite turrets (46) comprising means (47) of holding a plurality of components and each satellite turret (46) being driven in rotation through a predetermined angle about its axis of rotation when said satellite turret (46) reaches at least one predetermined point on the main path.
