Abstract (en)

[origin: WO2017137175A1] The invention relates to a laundry care appliance (100) having a detergent solution container (109) for receiving washing detergent solution and a detergent solution pump (117) for pumping washing detergent solution, wherein the detergent solution pump (117) has a pump pressure chamber (125) and a first pressure port (127) fluidically connected to the pump pressure chamber (125) for discharging washing detergent solution under pressure, and it has a variable-speed pump drive (137) for driving the detergent solution pump (117). A second pressure port (129) for discharging washing detergent solution under pressure is fluidically connected to the pump pressure chamber (125), wherein the first and second pressure ports (127, 129) tangentially adjoin the pump pressure chamber (125).
