Abstract (en)
[origin: WO2017137176A1] The invention relates to a laundry care appliance (100) having a detergent solution pump (105), wherein the detergent solution pump (150) has a suction chamber (107) having a suction connector (109) for fluidically connecting to a suction line, a recirculation pressure chamber (115) having a recirculation connector (117) for fluidically connecting to a recirculation line, and a drainage pressure chamber (111) having a drainage connector (113) for fluidically connecting to a drainage line, and a filter element (123) accommodated in the suction chamber (107). The filter element (123) has a wall section (125) arranged between the suction chamber (107) and the recirculation pressure chamber (115) in order to delimit the suction chamber (107) and the recirculation pressure chamber (115) from one another, wherein the wall section (125) has a wall opening (127) in order to fluidically connect the suction chamber (107) and the recirculation pressure chamber (115) with one another.
