Abstract (en)
[origin: WO2017137239A1] The invention relates to a domestic appliance device, particularly a domestic refrigerator device, comprising at least one appliance body having at least one rear wall, at least one shelf unit, and at least one retainer unit provided for retaining said shelf unit. In order to improve properties with respect to advantageous shelf unit retention, the retainer unit comprises at least one retainer element whose main extension direction extends, in at least one operating state, at least substantially parallel to the rear wall and at least substantially in a horizontal direction.
