Abstract (en)
[origin: CN108943319A] The invention relates to a press for extruding and pressing materials, comprising a press frame, an upper pressure plate in an upper part of the press and a lower pressure plate in a lower part of the press, wherein the upper pressure plate and/or the lower pressure plate are loaded by a plurality of pressure cylinders arranged in a plurality of rows and are provided with a plurality of control valves connected with the pressure cylinders. The pressure cylinders are each provided with at least one self-control valve. The invention also relates to a method for operating the press.
