Abstract (en)  
[origin: EP3415828A1] The invention is a movable temperature adjusting device, comprising heating and/or cooling means, identifying means configured to identify a user, and sensing means configured to sense at least one quantity indicative of a heating and/or cooling demand of the user, wherein the movable temperature adjusting device is adapted to operate the heating and/or cooling means based on the heating and/or cooling demand of the user.
