Abstract (en)
[origin: WO2017141150A1] The re-closable container (2) for fluid products, particularly for medical products, pharmaceuticals, cosmetics, food or the like, comprises: - a hollow body (3) for containing a fluid product and having a neck (4); - a closure plug (10) having: - an attachment portion (11) which, in a closing configuration, is associated with the hollow body (3) along a predetermined breaking line (12) able to allow the separation of the closure plug (10) from the hollow body (3) in a separation configuration wherein on the hollow body (3) is formed an outflow opening (13) of the fluid product; and - a cap portion (15) delimited by a side wall (16) and by a bottom wall (17), wherein the cap portion (15) is joined to the attachment portion (11) and which, in a reclosing configuration, is fitted on the neck (4) to reclose the outflow opening (13); and - spacer means (20, 21, 22) able to keep, in the reclosing configuration, the bottom wall (17) at a predefined distance (D) from the outflow opening (13).
