Abstract (en)
[origin: CA3009233A1] A water pipe has a housing into which a container to be filled with a liquid medium and having at least one suction connection and a heating chamber connected with this serving as receptacle for a smoke medium and having an air inlet are integrated. The heating chamber has a receptacle for a capsule serving for the provision of a smoke medium. An electronic unit controls heating of the receptacle in use. The receptacle is configured to receive a capsule adapted to hold the smoke medium. The receptacle has a side wall that includes a taper and is configured to surround a side of the capsule while the capsule is disposed within the receptacle. The side wall comprises a heating element to heat the capsule.
