Abstract (en)

[origin: EP3418442A1] Washing machine (102) comprising a controller (504) and a sensor (110) constructed and arranged to obtain an indication of degradation of a degradable identifier (106) of a garment (104) during a washing cycle of the garment (104) in the washing machine (102), whereby the controller (504) is configured to use the indication of degradation received from the sensor (110) to generate an output to a user indicative of a washing status of the garment (104).
