Abstract (en)

[origin: WO2017144678A1] The invention relates to a method for printing a substrate (2) made of cardboard or another fiber-containing flat material with a printing substance which contains metal pigments in a printing machine, having the following steps: • printing a first printing substance (4) onto the substrate, • printing a second printing substance (8) which contains a dye onto the first printing substance, and • printing a third printing substance (5) which contains metal pigments onto the second printing substance.
